OF ELECTRONICS**

POWERING POSSIBILITIES.

2026 PRODUCT CATALOGUE

ABOUT COMPANY

PLE — Empowering Every Life.

Technology has become the foundation of modern life. It powers businesses, accelerates innovation, strengthens education, connects communities, and transforms the way people live and work. Yet access to quality technology often remains fragmented, complex, and limited by affordability, availability, or procurement challenges.

Peoples League of Electronics (PLE) was founded to change that.

PLE is an Indian technology company committed to building an integrated ecosystem where individuals, businesses, educational institutions, enterprises, and government organizations can discover, procure, and manage technology through one trusted destination. We believe that technology should never be a privilege reserved for a few—it should be an opportunity available to everyone.

Our philosophy is simple: **make technology simpler, smarter, and more accessible.**

Rather than operating as a conventional electronics retailer, PLE is developing a technology ecosystem designed around the evolving needs of modern India. Through our unified digital platform, we bring together **100+ leading global and Indian brands** across diverse technology categories, providing customers with authentic products, competitive value, and a seamless purchasing experience.

At the heart of PLE lies a dual-platform model that serves both consumer and enterprise customers. Individual customers enjoy an intuitive retail experience through our website and mobile application, while organizations benefit from enterprise-grade procurement capabilities including enquiry-based purchasing, customized quotations, GST-compliant transactions, RFQ workflows, and dedicated business support.

This unified approach removes the traditional divide between retail and enterprise procurement, enabling every customer—from first-time buyers to large organizations—to experience the same commitment to quality, transparency, and service excellence.

Our vision extends beyond catalogue-based commerce. We understand that businesses often require products that may not be readily available through conventional channels. Through our specialized sourcing capabilities, PLE helps customers procure technology solutions beyond standard listings, ensuring flexibility, reliability, and faster access to the products they need.

As a registered seller on the **Government e-Marketplace (GeM)**, PLE proudly supports government departments, public sector undertakings, educational institutions, and other public organizations by delivering reliable procurement solutions through a transparent and compliant framework.

Every aspect of PLE is built upon long-term trust. From the brands we partner with to the services we deliver, our objective is to create meaningful value rather than simply facilitate transactions. We believe that

lasting customer relationships are established through authenticity, consistency, and an unwavering commitment to excellence.

Innovation also carries responsibility. As technology continues to advance, sustainable practices become increasingly important. PLE actively promotes responsible electronic waste awareness, encourages environmentally responsible recycling through authorized channels, and continuously works toward adopting sustainable business practices that reduce environmental impact while supporting long-term growth.

The future of technology is no longer defined by products alone—it is defined by experiences, ecosystems, and accessibility. PLE is committed to continuously expanding its capabilities, strengthening strategic partnerships, embracing emerging technologies, and developing solutions that empower customers to thrive in an increasingly digital world.

Our ambition is clear: to build one of India's most trusted technology ecosystems—connecting people, businesses, institutions, and governments through innovation, reliability, and opportunity.

Because for us, technology is not merely what we sell.

It is what we enable..

Our Vision

To build India's most trusted technology ecosystem, empowering individuals, businesses, institutions, and governments with accessible, reliable, and future-ready technology solutions.

Our Mission

To simplify technology procurement by delivering authentic products from 100+ trusted brands through a unified consumer and enterprise platform, while fostering innovation, transparency, sustainability, and exceptional customer experiences.

What Defines

PLE 100+ Trusted Global & Indian Brands

A growing portfolio of industry-leading technology partners delivering authentic and reliable solutions.

Unified Consumer & Enterprise Platform

One digital ecosystem designed to seamlessly serve both individual customers and business organizations.
Government Procurement Ready

Supporting transparent and compliant procurement through the Government e-Marketplace (GeM).

Technology Without Boundaries

From everyday technology to specialized sourcing, PLE is committed to helping customers find the right solution.

Built on Trust

Every interaction is guided by integrity, transparency, quality, and long-term customer relationships.

Future Focused

Continuously evolving through innovation, strategic partnerships, and customer-centric digital experiences..

Powering Possibilities. Building the Future.

At Peoples League of Electronics Private Limited, we believe technology is more than just products—it is a foundation for growth, innovation, productivity, and meaningful progress.

From reliable PC peripherals and consumer electronics to IoT solutions and high-performance computing systems, we are committed to delivering quality technology solutions designed to meet the evolving needs of businesses, institutions, professionals, and individuals.

We look forward to building lasting partnerships, creating value, and growing together through technology.

Let's connect. Let's innovate. Let's build the future together.
